Flairline

Farmington, Mich., -based Flairline, which manufactures pneumatic and light-duty hydraulic cylinders and components, came to UTS for help in redesigning its Web site.

The result is a colorful, lively presentation that showcases both the company and its products. A key feature is downloadable CAD drawings of Flairline products, available to registered users. There is also a map of the U.S. click-linked to Flairline distributors, with additional links to the distributors' Web sites.

Flairline is a division of ACE Controls, Inc., also located in Farmington.
